Reasons for Allowance

1. Claims 1-45 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art made of record fails to anticipate or make obvious the claimed invention. Specifically, the prior art fails to teach, in combination with the remaining elements:

the method and system comprising receiving in response to a sizing input, a sizing module sizing one or more disparate sections of a first component asymmetrically in order to mitigate pixilation and disproportionate appearance of the first component or inconsonant appearance of the UI element as recited in claims 1, 4, 16 and 22; and, sizing an image wherein that image is then adjusted, aligned or repositioned using a bitmap or DPI or vector or a second component of the UI element from a library of second components in order to prevent/curtail pixilation and disproportionate/attenuate appearance of the bitmapped component/UI element as recited in claims 9, 16, 22, 27, 32, 38, 42 and 44.

Although Isreal et al., Simons et al., Marflak et al. and Higgins et al. teach a substantial amount of the claimed matters, Isreal et al., Simons et al., Marflak et al. and Higgins et al. fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
